

Quick start guide - King class sound project by locomansounds

Throttle to full: at low speed -> wheelslip / at higher speed -> faster acceleration

Throttle reduction to speed step 1 or 2 or 3 -> slightly braking

Throttle to zero -> shorter braking time

F1 sound on and volume adjustment

F2 playable whistle

F3 other whistles

Set function keys to momentary

F4 (also F14) braking - shorter braking distance

F5 drain cocks (enable / disable)

Set function key to momentary

F6 auto coupling/uncoupling with uncoupling shuffle (also Aux 3)

F7 stationary: guard's whistle / when driving: curve squeal

Set function key to momentary

F8 heavy load simulation

F9 coasting sound

F10 coal shovelling

F11 ejector and blower

Set function key to momentary

F12 doors

F13 injector

F14 shorter braking distance

F15 safety valve

F16 NOT F17 water tower / F16 AND F17 coal tower

F17 shunting mode

F18 disable brake squeal

F19 disable momentum

F20 Aux 2 (Seuthe smoker)
